Summary

ML/AI leader, practitioner, and org-recognized AI Champion (9+ years) building and leading production AI, ML, and data platforms—led teams of up to 6, drove programs across 8+ orgs, and delivered ~\$45M/month recovered revenue and >95% reporting-toil reduction.

Experience

Microsoft, Redmond, WA | **Sr. Data & Applied Scientist**

Nov 2020 – Current

Technical Leadership & AI Adoption:

- As an org-recognized **AI Champion**, drove AI adoption across the team—co-led a 90-minute internal AI Day-of-Learning, mentored engineers (reviewed 17 PRs, onboarded a new hire), and led cross-org incident response (4-team Sev-2).
- Led a 2-person effort building adaptive pre-release **stress-testing** for Azure Storage (**multi-armed bandits**, 60% fewer false positives) that helped prevent **10+ Sev1/Sev2 incidents**; authored the design doc + internal white paper.

Cross-Org Programs:

- Drove the **Mission-Critical Customers (MCC) health program** and a unified customer-health view across **8+ engineering/support teams**, cutting executive/customer readiness insight from **3-5 days to near real-time**—with ~50% fewer >10-day aging issues and **~16% faster time-to-mitigate**.
- Helped reverse churn/downtrend risk for **10+ critical customers**—each representing multi-millions in monthly Azure Storage revenue—by accelerating early detection and action on customer-impacting issues.

AI & Agentic Delivery:

- Architected an enterprise **LLM agent** that turns natural-language questions into governed live Kusto/ADX queries and PM-ready narratives, cutting customer-health time-to-insight from **days to <2 minutes** across 13 metric domains.
- Reduced multi-hour on-call incident investigations to **minutes** with an autonomous multi-agent LLM loop (planner/executor on Azure OpenAI); shipped two reusable **Model Context Protocol (MCP)** tool servers used by Copilot, VS Code, and internal agents.

Platform & Revenue Impact:

- Recovered and sustained **~\$45M/month in influenced partner revenue** (at <1% variance vs Finance, ~4× partner coverage) by rebuilding a 20+ component partner-attribution pipeline with **multi-partner credit** replacing last-writer-wins.
- Caught silent upstream data regressions—including an **~88% row-collapse**—before they reached Finance by building a self-service **data-quality monitoring service** with anomaly detection and hourly table-health profiling over 47 datasets.

Walmart Labs, Bentonville, AR | **Senior Data Scientist**

Feb 2019 – Nov 2020

- Led **4 DS/analysts + 2 interns** to productionize a repeatable item-level placement workflow; earned a Spot Award.
- Delivered **~7% category revenue lift** across 50 stores with an end-to-end **planogram optimization** system, cutting planning cycles from weeks to hours.

Integral Ad Science, New York, NY | **Data Scientist Intern**

June 2018 – Aug 2018

- Built a PySpark contextual text-classification pipeline processing **~1M URLs/day across 846 categories** (88% accuracy); improved label quality via correlation analysis.

Mu Sigma Business Solutions, Bengaluru, India | **Data Scientist**

Oct 2015 – July 2017

- Estimated **customer lifetime value (CLTV)** with probabilistic/regression models; improved competitive reporting by unifying product IDs via fuzzy matching.

Education

University of Illinois at Chicago (UIC), Chicago, IL | **MS-Business Analytics**

Aug 2017 – Dec 2018

SGSITS, Indore, India | **B.E. in Computer Engineering**

Aug 2011 – July 2015

Skills

- Leadership:** ML/AI team leadership & strategy, mentoring & onboarding, cross-org program management, incident command, design docs & technical writing, XFN alignment
- Analytical Techniques:** Generative & agentic AI (agents, MCP, RAG), experimentation & causal inference, embeddings, online learning (multi-armed bandits), anomaly detection, statistical modeling
- Tools & Areas:** Python, SQL, Kusto, PySpark, FastAPI, Power BI, Azure DevOps; applied AI delivery, product analytics & roadmap, partner/revenue attribution, cloud reliability, production ML
